

# ACKNOWLEDGEMENTS

The production of this book was helped greatly by generous sponsorship from the Australasian Wildlife Management Society, Landcare Research Capability funding to ASG, and an Australian Research Council Professorial Research Fellowship to CRD.

In addition to the chapter authors, many other people contributed their time and effort. Our sincere gratitude goes to Andrea Byrom, Roger Pech and David Choquenot for supporting the original proposal, and to Don Wilson and Stephen Jackson for constructive comments on the proposed outline of the book. Many others donated their time and expertise to provide constructive peer review of the

draft chapters. We thank A. Bengsen, M. Braysher, B. Brook, A. Byrom, E. Denny, A. Diment, G. Edwards, A. Elledge, P. Fleming, T. Friend, T. Gehring, M. Greenlees, C. Hughes, J. Innes, P. Jarman, D. Jenkins, T. Jessop, E. Jones, J. Long, D. Lunney, T. Newsome, R. Pech, T. Pople, J. Short, J. Watson, S. Wroe and a number of other reviewers who preferred to remain anonymous for their valuable comments and suggestions. Finally, we thank CSIRO Publishing, and in particular John Manger and Briana Melideo, for their support and assistance throughout.
