Preface	viii
List of contributors	x
An introduction to the global food security, technology and policy nexus <i>Robert S. Zeigler</i>	xiv
PART 1 TAPPING AND CREATING GENETIC RESOURCES	1
1 Systematic assessment for conservation and utilisation of crop genetic resources	3
<i>Paula Bramel and Sarada Krishnan</i>	
2 Crop species origins, the impact of domestication and the potential of wide hybridisation for crop improvement	15
<i>Bikram S Gill, Bernd Friebe, Dal-Hoe Koo and Wanlong Li</i>	
3 Technological and policy challenges to utilisation of plant genetic resources	36
<i>Theo van Hintum and Martin Brink</i>	
4 Oryza genome diversity: discovery, management and utilisation	49
<i>Rod A. Wing</i>	
PART 2 REDESIGNING CROP PLANTS	61
5 Reducing mineral and vitamin deficiencies through biofortification: progress under HarvestPlus	64
<i>Howarth Bouis and Ross Welch</i>	
6 Delivering biofortified crops in developing countries	82
<i>Howarth Bouis, Jan Low and Robert S. Zeigler</i>	
7 Fatty acids and pharmamolecules	97
<i>Surinder Singh, Phil Larkin and Allan Green</i>	

8	Resistant starch, large bowel fermentation and human health	113
	<i>David L. Topping</i>	
9	Redesigning crop photosynthesis	128
	<i>Stephen P. Long, Steven Burgess and Isla Causton</i>	
PART 3 MODERN PLANT BREEDING		145
10	Modern plant breeding: a perspective from the public sector in the United States	148
	<i>P. Stephen Baenziger</i>	
11	Improving the regulation and social acceptance of crop-protection and seeds products produced using new technologies: an industry perspective	162
	<i>Alan Raybould</i>	
	Colour plates	187
12	Plant phenome to genome: a big data challenge	203
	<i>Robert T. Furbank, Xavier R.R. Sirault and Eric Stone</i>	
13	Incorporating stress tolerance in rice	224
	<i>Abdelbagi M. Ismail and Gary Atlin</i>	
PART 4 MANAGING THE CROP		247
14	Closing crop yield gaps around the world	250
	<i>R.A. Fischer</i>	
15	The soil microbiome and crop nitrogen nutrition in anaerobic systems: a case study in rice	278
	<i>J.K. Ladha and P.M. Reddy</i>	
16	Manipulating molecular interactions between hosts and pathogens for enhancing resistance and disease management	303
	<i>Barbara Valent and Jan E. Leach</i>	
17	Sustainable rice pest management: the role of agricultural policies	324
	<i>E.A. Heinrichs</i>	
18	A view of water management: from river basin to farm	352
	<i>Gilbert Levine and Randolph Barker</i>	

PART 5 SUSTAINABLE INTENSIVE SYSTEMS	367
19 Remote sensing for sustainable agricultural management	369
<i>Andy Nelson</i>	
20 A new public–private interface for staple crops: the Sustainable Rice Platform	389
<i>Robert S. Zeigler and Achim Dobermann</i>	
21 Linking public goods with private interests: investing in performance at scale with smallholders and the private sector	397
<i>A. J. Simons, H. Y. Shapiro and Robert S. Zeigler</i>	
PART 6 MAJOR AGRICULTURAL REGIONS IN TRANSITION	409
22 Agricultural growth, transformation and policies in China	411
<i>Jikun Huang</i>	
23 Modern plant and agricultural sciences and public policies in India: creating a sustainable global food supply	429
<i>Rita Sharma</i>	
24 Unlocking Africa’s agricultural potential	446
<i>Akinwumi A. Adesina</i>	
25 Sub-Saharan agriculture in transition: the case of rice	461
<i>Keijiro Otsuka</i>	
PART 7 GLOBALISATION OF FOOD SUPPLY	477
26 The rapid transformation of food supply chains in developing and emerging economies with implications for farmers and consumers	479
<i>Thomas Reardon and B. Minten</i>	
27 Social change and policies driving the transformation of consumption in the food systems	494
<i>Joachim von Braun, Nicolas Gerber and Vicki Abresch</i>	
28 Trade as a means to meeting global food needs	507
<i>Kym Anderson</i>	
<i>Some closing thoughts</i>	520
<i>Robert S. Zeigler</i>	
<i>Index</i>	525
