Useful websites

See also Useful contacts. The following publications and websites have been of great use to the author and may prove to be the same for you:

Aerial photograph interpretation: finding your rainforest from the sky!

Google Maps: <http://earth.google.com>.

Biological databases: lots of photos and good information on rainforest and other taxa.

Flora Information System

Viridans Biological Databases

Australia's Virtual Herbarium. <www.anbg.gov.au/avh/>

PlantNET: Royal Sydney Botanical Gardens' species data, including type specimens, and identification keys for the plants of NSW.

Climate change trends and impacts

Bureau of Meteorology: <www.bom.gov.au>

Cooperative Research Centre for Australian Weed Management: <www.weeds.crc.org.au> Ref: 1/2007/bn.

CSIRO: <<http://climatechangeinaustralia.gov.au/resources.php>>: rainfall and temperature animations among others.

University of New South Wales Climate Change Research Centre: <<http://www.crc.unsw.edu.au/>>. Their new research suggests the pre-eminence of the Indian Ocean Dipole in mediating drought in south-eastern Australia and that climate change is beginning to influence this cycle. **Very, very important: stay tuned for further results.**

Covenanted and bushland management

Bush Heritage: <www.bushheritage.org.au>

Trust for Nature: <www.trustfornature.org.au>

Education (TAFE courses at Certificate and Diploma level in Conservation and Land Management)

Central Gippsland TAFE <<http://www.gippstafe.edu.au/>>

Campuses:

Leongatha

Morwell

Sale

East Gippsland TAFE (Forestech) <www.egtafe.edu.au/forestech/index.htm>

Main campus: Kalimna West (via Lakes Entrance).

Outreach Centres:

Buchan

Heyfield

Mallacoota

Orbost

Swifts Creek

Yarram

Gordon Institute of TAFE <www.gordontafe.edu.au>

Campuses:

Colac

East Geelong

Illawarra TAFE <<http://www.illawarra.tafensw.edu.au/>>

Campuses:

Bega

Cooma

Moruya (Batemans Bay)

Environmental networking and participation (deep ecology and how to get involved)

Globally and local: <www.wiserearth.org>

Parasitic plants: Lorantheaceae: <www.parasiticplants.siu.edu/Loranthaceae/index.html>

Natural resources hub

http://www.nratlas.nsw.gov.au/wmc/custom/popups/identify_species.html

New South Wales Government definitive website information

These sites provide information on species names, descriptions and mapped distribution of sightings and ranges, as well as identification keys:

BioNet: Search and map the flora and fauna (plant and animal) species collections of the Australian Museum, NSW Department of Environment and Conservation and NSW Department of Primary Industries.

FaunaNet: Australian Museum's fauna sightings, species distribution and species [identification keys](#) for beetles, bugs and frogs.

Fishfiles: All the data previously contained in FishFiles, and much more, is now available in [BioNet](#).

NSW Flora Online: Royal Botanical Gardens' website for plant species information.

PlantNET: Royal Sydney Botanical Gardens' species data, including [type specimens](#), and [identification keys](#) for the plants of NSW.

Vegetation classification of NSW: Classifying NSW plant communities and assessing their conservation status and threats.

Wildlife Atlas: 2 million plant and animal records managed by Department of Environment and Conservation (DECC - formerly NPWS).

New South Wales rainforest plant species taxonomic updates

Gwen Harden Publishing will update name changes, corrections and additions to information and extensions in distributions of rainforest plants covered in *Rainforest Trees and Shrubs: A field guide to their identification* (Harden *et al.* 2006); and in *Rainforest Climbing Plants: A field guide to their identification* (Harden *et al.* 2007): <www.rainforests.net.au>

Pest management

Cooperative Research Centre for Australian Weed Management: <www.weeds.crc.org.au>
